Happy for this CV to be stored and distributed

I'm a creative problem-solver with an unusual hybrid of hands-on experience - spanning design, construction management, crafting and styling.

With a learner's mindset, I've invested time understanding the artistic process behind a production, building a holistic view across the materials, processes and talent that contribute to a vision. I love every stage of bringing a set to life - researching, sourcing, collaborating, logistics, prepping and being on set - whether in a studio, on location, in the office, or scouring a prop house.
